## Superior Exterior Protection

Disclaimer

We have made every effort to make the colours on screen as close to actual paint colours as computer screen resolutions as allow. Please refer to paint chop samples for an accurate match. Colours will vary depending on your screen settings and resolution. Applied sample is recommended when colour matching is critical.

**Jotun Paints**

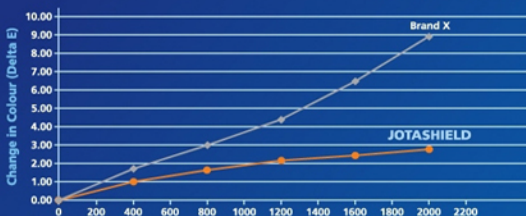

# LONGER LASTING COLOURS

First impression is everything. Which is why we want longer lasting colours on our exterior walls. Be it for homes, storefronts, housing developments or high rise buildings.

Our 2X UV Protected Colours will ensure that your exterior walls will retain that "I got it painted yesterday" look for many years to come. Jotashield has been subjected to the most stringent natural weathering tests in Malaysia, UAE, USA and Norway to simulate variable extreme weather conditions.

COLOUR RETENTION TEST

Number of Hours of UV Accelerated Weathering  
Colour Retention Test by 2,000 hours Accelerated Weathering  
Delta E defines the total colour difference between the sample and standard

Colours that lasts longer.

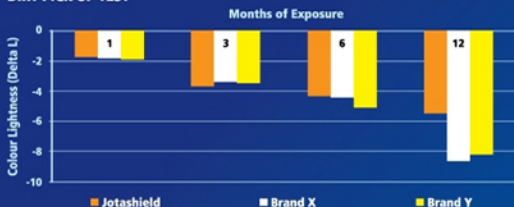

Jotashield offers the widest range of 2X UV Protected Colours

# BRIGHTER CLEANER EXTERIOR

Unsightly black streaks on exterior walls are caused by the accumulation of dust and dirt over time. The humidity of the tropical weather only accelerates the process even further.

**Jotashield employs a hard binder system that lets the rain to naturally wash the dirt and dust away, giving you a brighter and cleaner exterior.**

## DIRT PICK UP TEST

\* Result shows Jotashield has the lowest dirt pick up after 1 year of natural weathering exposure.

The Jotashield effect – homes continue to look brighter and cleaner. Year in, year out. Hence saving you on maintenance costs.

**Jotashield gives the best value for your money**

# EXCELLENT WEATHER RESISTANCE

Heat. Humidity. Heavy monsoon. All are trademarks of the Asian tropical climate. Your exterior walls need all the protection it can get.

With over 30 years of extensive research on weathering fastness, you will find that Jotashield's 100% Pure Acrylic is incredibly resilient to Asia's uncompromising climate.

Rain or shine, Jotashield is the best against the harshest weather

Protect your home with the highest grade acrylic - Jotashield's ultimate quality assurance!

**Jotashield - Superior protection against all weather elements**

# EXTERIOR PROTECTION YOU CAN TRUST

Over time, the extreme weather conditions of the tropical climate often leaves exterior walls exposed to unwanted growth like algae, fungus and mildew growth.

Jotashield is fortified with many other features to ensure superior exterior protection. Containing a dry film preservative, Jotashield protects your exterior walls from these unwanted elements.

We also use premium exterior pigments & binders with excellent alkali resistance to prevent walls from 'chalking' and becoming 'efflorescent'.

Less maintenance and less worries!

**Jotashield - Superior Exterior Protection**

# EXTREME DURABILITY FOR EXTREMELY HARSH TROPICAL CLIMATES!

Exterior walls of your home absorb heat from the sun, leading to warmer interiors, higher cooling costs and faster paint deterioration.

Jotashield Extreme's 2X Heat Reflective feature utilizes infrared pigments to reflect up to twice the amount of heat away from your walls compared to standard paints. Key benefits include excellent indoor comfort, lower energy consumption and longer lasting colours.

Buildings painted with Standard Paints remain hotter

Buildings painted with Jotashield Extreme have cooler interiors

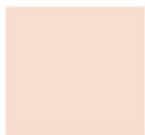

100% Extreme Acrylic formula delivers unparalleled strength, resistance to cracking, flaking and chalking. Formulated with an 8-year warranty - the first of its kind in Malaysia - it's the new standard for exterior paints.
